WORK EXPERIENCE

Full Stack Developer @ *Swift Transportation - Dallas, TX , USA*

Oct 2025 – Present

- Architected the **GMAdjustment module** for the Pricing API using **C#** and **Elasticsearch**, enabling efficient management and real-time indexing of complex logistics lane configuration records.
- Developed responsive interfaces in **Vue.js** integrated with **.NET Core** services, streamlining the data synchronization pipeline between front-end pricing tools and back-end data stores.
- Optimized **API endpoints** for the Global View platform, improving the accuracy of **logistics data** retrieval and reducing latency for high-volume pricing requests.

Founding Software Engineer @ *AcquisitionAI - Dallas, TX , USA*

July 2025 – Sep 2025

- Led full-stack development of a real-time **AI phone agent** platform, designing scalable APIs and implementing security protocols, boosting system reliability by **58%**.
- Developed backend services with **Node.js**, Express, and **Supabase**, using Docker, Kubernetes, and CI/CD pipelines to cut deployment time by **63%** and double request handling capacity.
- Integrated **AI/NLP** features including Bland AI and custom LLMs, improving response accuracy by 47% through testing, benchmarking, and code optimization.

Software Engineer @ *LogixHealth - Bedford, MA , USA*

Sep 2023 – March 2025

- Led the migration of 20+ tables and 30+ stored procedures to a new **MySQL** database, improving query performance by 68% and enabling faster, data-driven decision-making for **operations workflows**.
- Engineered secure, scalable **RESTful APIs** using C# and .NET with Swagger, and optimized **ETL scripts** for large-scale patient data, improving request handling efficiency by **57%** and data processing performance by **43%**.
- Implemented voucher card functionality in the DoctorPayment app using **Angular**, **TypeScript**, and HTML, optimizing UI performance and reducing page refresh time by **44%**.
- Optimized **CI/CD pipelines** by refining **YAML** configurations, integrating Docker, and automating DACPAC deployments, reducing manual effort by **66.67%** and cutting deployment time from **30 to 10** minutes.
- Streamlined **project management** by handling high-priority PBIs in **Azure DevOps** and designing **use case** diagrams in **Azure Wiki** with Mermaid to enhance **team collaboration** and project clarity.

Software Engineer @ *Code Trade PVT LTD. - Gujarat, India*

Nov 2019 – March 2021

- Integrated **Angular** Front-end, C# and **ASP.NET Core** backend, and **SQL Server** database management, contributing to the successful launch of **5+** features within sprint cycles and ensuring **end-to-end** functionality across the stack.
- Architected RESTful APIs using **Spring**, enabling efficient system communication and ensuring high flexibility in endpoints and payloads for better **cross-platform** integration.
- Published optimized SQL queries and customized schema designs in **SQL Server**, driving performance improvements and streamlining database management processes across the application lifecycle.

TECHNICAL SKILLS

Programming Languages: C#, Python, C/C++, Java, HTML5, CSS3, JavaScript, node.js, React JS, Angular, Vue.js

Database: MS SQL Server, Oracle, MySQL, MongoDB, PostgreSQL, ElasticSearch

Frameworks and Tools: Microsoft Excel, ASP.Net Core, Microservices, RESTful API, Tableau, PowerBI, Tailwind

Build Tools: Maven, Gradle, JUnit, SonarQube, Docker, Jenkins, Jira, Azure develops board, RabbitMQ, Flask

Cloud Platforms: Amazon Web services (IAM, EC2, S3, Elastic Load Balancing, Elastic Beanstalk, Dynamo DB)

Methodology: SDLC, Waterfall, Agile

Version Control Tools: Git, GitHub, GitLab

PROJECT WORK

Wonder Boon | *Java, Spring, HTML*

- Developed a web-based online gift application using Java Servlets and WordPress, designing an intuitive interface and creating database structures with UML and use case diagrams for efficient relational mapping.
- Exhibited originality by leveraging **HTML** and **CSS** to design and create an eye-catching webpage, hence elevating the project's overall visual appeal.

Intrusion Detection System | *Graylog Server, Snort INS tool*

- Implemented **Snort IPS** on **Ubuntu** to detect and mitigate real-time threats, preventing future attacks by tracking and analyzing system activity logs of gateways and network devices
- Monitored device logs and analyzed network connections using **Graylog**, assessing message frequencies via a centralized dashboard for efficient threat detection and event investigation.

EDUCATION

Arizona State University | Master's in Information Technology | **GPA: 3.67/4**

Tempe, Arizona

Courses – NLP, Analyzing Big Data, Cloud Architecture, Developing Security Policy

2021 – May 2023

Gujarat Technological University | B.Tech in Computer Engineering | **GPA: 3.33/4**

Ahmedabad, Gujarat

OOP, Software Engineering, Web Technology, Distributed DBMS, AI, Python Programming

2016 – 2020

CERTIFICATION

Certified with **AWS Solutions Architect - Associate**

Certified with **AWS Academy Cloud Security Foundations**
